

NALEO LED

PROJECTEUR LED SOLAIRE EXTERIEUR 10W IP65 NOIR avec détecteur de mouvement

Référence:XS-ZDBD

Marque:NALEO LED

Conforme à l'arrêté du 27 décembre 2018 relatif à la prévention, à la réduction des nuisances lumineuses

**Puissance:
10W**

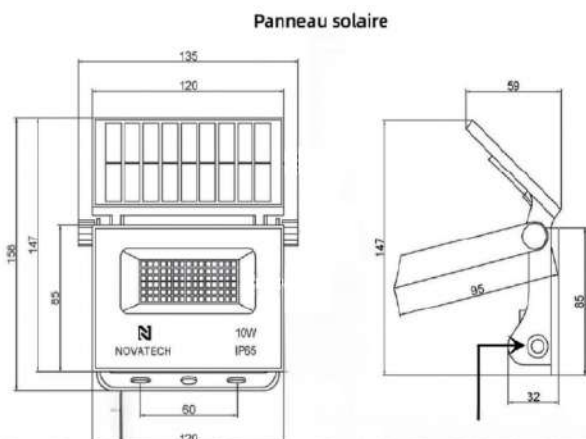

**Indice de protection
IP65**

**Certifications
CE & RoHs**

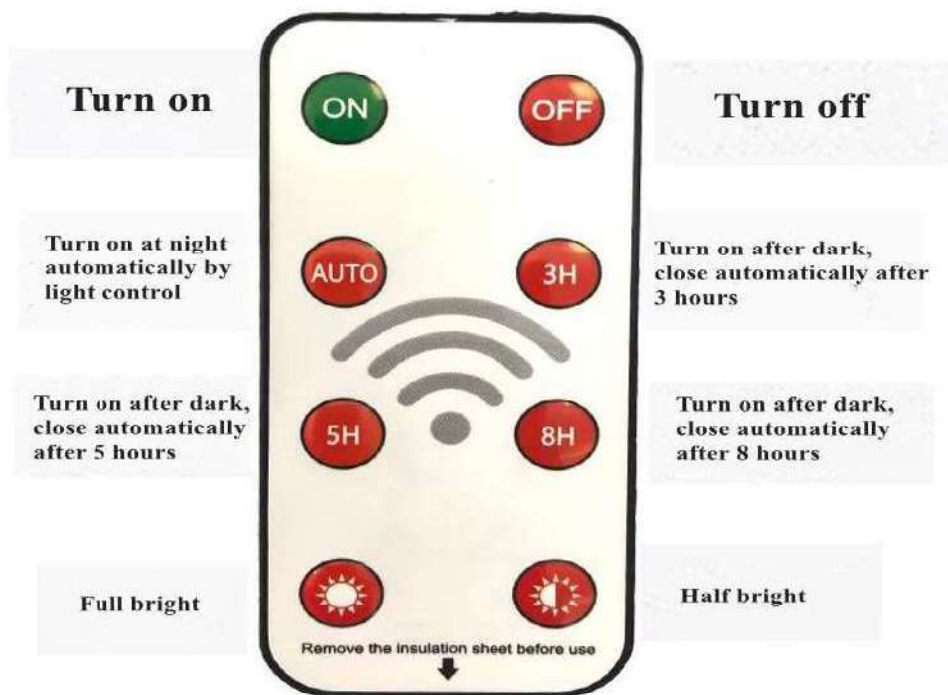

Disponible en 6000K

*ULR nominal < 3 % pour une inclinaison
de 45° par rapport à l'horizontal*

Dimensions:	150 x 120 x 38 mm
Panneau solaire:	71.5 x 116.5 x 2 mm, 5 V 1 W
Perles lumineuses:	2835.80 perles
Batterie:	3.7 V, 1.2 A
Indice d'étanchéité:	IP65
Lumen (LM):	135 Lm/W
Consommation LED:	10 W
Température de couleur:	6500 K
VERT:	60°
IRC :	Ra 80
Durée de vie:	~100.000h
Garantie:	2ans

Remote control introduction

- Charging time with solar irradiation is 5-8 hours, but there are many factors due to the processes of usage and region with customers.
- Timing function: 3H, 5H , 8H
- Another mode is brightness adjustment mode, which is indicated on remote control.
- Usually power on (installed) is defaulted to automatic mode.
- Automatic mode: The brightness of the whole lamp can be adaptively controlled according to the battery's own power.
- Microwave sensor: When people(object) passing by within sensing area it is 100% brightness and when off the sensing area it is dim to 5% brightness

	Turn On		Turn Off
	Turn on at night automatically by light control		Turn on after dark,close automatically after 3 hours
	Full bright		Turn on after dark,close automatically after 5 hours
	Half bright		Turn on after dark,close automatically after 8 hours
